

THE AI CASE TEAM

What the AI does. What your people decide.

AI reads and prepares · Rules calculate and control · People approve

5

stages in one dispute

10

business agents

10

mandatory human gates

0

autonomous submissions

AI

Reads and prepares

Reads EOBs, summarizes payer replies, drafts notices and assembles evidence packets — always with the source attached.

RULES

Calculates and controls

Eligibility logic, business-day deadlines, arithmetic, case state and versioned decisions. Deterministic, every time.

PEOPLE

Decide and approve

Eligibility, settlements, filings, offers, rule changes and closure. Named owners, recorded approvals, full audit history.

THE FLOW

One dispute, end to end.

Read left to right. At every stage the AI prepares the work, a named person signs it off, and only then does the case move. Nothing skips a gate.

■ AI prepares ■ A person approves ■ Result

STAGE 01 INTAKE	STAGE 02 QUALIFY	STAGE 03 NEGOTIATE	STAGE 04 IDR	STAGE 05 COLLECT
■ AI · AGENT 1 • Reads EOBs, remits, support files • Extracts fields, matches service lines • Flags missing or low-confidence data	■ AI · AGENTS 2, 3, 4 • Applies federal, state and plan rules with reasons • Starts business-day clocks • Compares QPA, scores recovery	■ AI · AGENT 5 • Drafts the Open Negotiation notice • Summarizes payer replies • Compares settlement options	■ AI · AGENTS 6, 7 • Builds cited statements and exhibit index • Runs attachment checks • Surfaces comparable IDRE outcomes	■ AI · AGENTS 8, 10 • Matches determination to remittance • Flags late or partial payment • Builds client and exec reporting
■ GATE 1 · YOU DECIDE • Resolve every uncertain field	■ GATES 2-3 · YOU DECIDE • Confirm eligibility and jurisdiction • Own any contested date	■ GATES 4-5 · YOU DECIDE • Send the notice • Accept, reject or counter	■ GATES 6-8 · YOU DECIDE • Initiate IDR, select the IDRE • Approve the evidence • Submit the final offer	■ GATES 9-10 · YOU DECIDE • Confirm disputed balances • Close the case
■ RESULT • One verified case record	■ RESULT • Eligible, prioritized case on a live clock	■ RESULT • Settlement — or IDR on day 31	■ RESULT • Filed dispute, defensible packet	■ RESULT • Cash received, reconciled, reported

RUNNING UNDERNEATH

Agent 9 tracks CMS and state rule changes — compliance approves every production change

Agent 3 holds every clock, on business days

Every action records source, case version, rule version, model, reviewer and timestamp

Ten agents. Ten signatures.

Eight agents work a single case; two work across the portfolio. Every row ends the same way – with a person.

CASE AGENTS · 1-8					
01	Claim Intake AI-assisted	A person resolves low-confidence fields	05	Negotiation Copilot AI drafting	An authorized person sends and accepts
02	Eligibility & Jurisdiction Deterministic-first	A specialist confirms eligibility	06	IDR Evidence Grounded AI	A specialist approves the submission
03	Deadline & Workflow Deterministic-first	A named owner resolves uncertain dates	07	Payer & IDRE Intelligence Advisory analytics	Advisory only — never auto-applied
04	QPA & Underpayment Rules + analytics	Finance owns the assumptions, visibly	08	Payment Reconciliation Deterministic-first	Finance confirms disputed balances
PORTFOLIO AGENTS · 9-10					
09	Regulatory Intelligence AI research + control	Compliance approves every change	10	Reporting Validated reporting	High-risk narratives are reviewed

Where your team signs — and what the AI never touches.

The limits below are enforced in the tool gateway, not in a prompt. An agent cannot reach any external system until an approval is recorded against the current case version.

TEN MANDATORY HUMAN GATES

1 Resolve uncertain data	6 Select the IDRE
2 Confirm eligibility	7 Approve the evidence
3 Send negotiation notice	8 Submit the final offer
4 Approve settlement	9 Activate a rule change
5 Initiate IDR	10 Close the case

WHAT HAPPENS NEXT

- 01 30-day diagnostic: confirm the real workflow, data and baseline KPIs.
- 02 Pick one pilot segment — one specialty, one or two payers.
- 03 Agents run in shadow mode; their output is compared to specialist decisions.
- 04 Expand only after accuracy, security and workflow gates pass.

FIVE THINGS THE AI WILL NEVER DO

- ✗ Invent evidence, dates, codes or amounts
- ✗ Change live rules without approval
- ✗ Send PHI to consumer AI accounts
- ✗ Scrape licensed data or bypass controls
- ✗ Autonomously submit to the CMS Gateway

RECORDED ON EVERY IMPORTANT ACTION

Source document · case version · rule version · model and prompt · reviewer · timestamp.

No percentage of recovery or time saved is claimed here. Those come from your own measured pilot — that is what the diagnostic is for.
